

BATHS OF PORCELAIN AND ENAMEL VENEER

Anti-slip product, specially formulated for use on porcelain, enameled sheet metal or cast iron tubs. Easy to apply, the treatment does not change the brightness and the colour of the bath. A single application lasts several years.

SECURITY

End with the accidents in your bathtub or shower. Avoid the transmission of illnesses produced by the accumulation of bacteria on small bath carpets or anti-slip adhesive.

TREATMENT

Easy application. Only one application lasts several years.

Clean the surface of the bathtub or the shower that you want to treat, apply the product, by pulverizing it in an homogeneous way on the surface, wait for the applications times of each bathtub, times indicated in the product instructions, once the indicated time has passed away, add a lot of water on the treated surface, and after that dry it.

The treated surface is ANTI-SLIP for several years without any necessity of realizing another application again.

Application times:

- Bathtubs of melted iron: 2 minutes
- Bathtubs of steel metal sheet: 2 minutes
- Shower plats of enamelled steel: 2 minutes
- Shower plates of vitrified porcelain : 10 minutes
- It is very important not to surpass the indicated time

The product is not valid for acrylic bathtubs or P.V.C.
